No need to do that (generate location descriptions) just pull what you can for locations.

Thanks

I talked to John and I think he has gleaned coordinate data from these maps. I was hoping that Stantec would have a bit of a sample location description tied to their locations somewhere so I could put a description in the table for you, but alas, it seems that location descriptions do not exist anywhere. Would you like me to spend some time looking at the locations to devise a location description for you?

Apparently the attached and links below will provide sample locations re Stantec and other NDDOH sampling.

Please confirm one way or the other.

Thanks

Dear Steve:

Below is an attached link with the Missouri River sites, above are some pdfs. Combined I believe you will get all the sites.

Pete,

Do you have a map that Stantec has provided with all of the sample locations. We have not been successful in finding that on their portal.

Thanks,

Steve
